Energy steps adult	150J – 200J – 200J
Energy steps child	50J – 50J – 50J
Pace maker detection	Yes
Motion detector	Yes
Impedance discharging	25 – 175 ohm
Maximum discharging	Typically 200 shocks with full battery
Derivation	DII
ECG bandwidth	2 – 25 Hz
Battery type	LiMnO (12 volt 4500 mA)
Self test schedule	Each start – daily – monthly – six monthly
Self test scope	Battery, hardware, software and capacitor
Dimensions	9.5cm x 27cm x 24cm
Weight including battery	1850 gram
Class (93/42/EEC)	II B
Operating conditions	0 to 50 degree C and 10 to 95% RH
Storage conditions	Between -20 and 60 degree C
Data documentation	ECG signal, event, voice recorder
Data transfer	Metsis AED software (mini USB)
Minimum PC requirement	Window XP – Vista – 7 Pentium or higher. VGA monitor or higher. CD-ROM driver. USB port 2 free disc space

- Accurate and reliable
- Easy to use
- Semi-automatic defibrillator
- Battery
- Adult pads set
- Kit (scissor, gloves, shaver)
- Carrying case
- 5 year battery life
- 5 year warranty
- Self testing of AED functions
- Pacemaker detection
- Motion detector for interference
- Lightweight at 1.85 kg
- IP54 rated
- 9.5cm x 27cm x 24cm
- Can connect to a Windows PC to check AED
- Child pads available
- AED Pro Screen includes colour ECG and AED function data
- Trade and bulk discounts available

LifePoint Trainer AED available

Need training?

We offer onsite training nationally through our national network of approved instructors who can deliver training in CPR and AED use. We also offer a comprehensive video

online training course at www.proaed.co.uk where you and your staff can learn online. For more details on training solutions for AED or any other first aid or health & safety subject call ProTrainings on 01206 805359 or email sales@protrainings.eu.
