

Canine Alcohol Free Disinfection
Effective to EN Test Standards Against
Bacteria, Fungi & Viruses

*Aqueos offers a range of products to
meet all the cleaning needs of dogs, their
owners and all surfaces.*

*PROVEN in a range of environments from individual
owners to veterinary practices and dog groomers*

KILLS BACTERIA, FUNGI & VIRUSES
INCLUDING: RINGWORM, PARVO VIRUS, AVIAN FLU, MRSA, E COLI,
SALMONELLA TO NAME A FEW.....

The Science

Aqueos uses a highly stable chelating agent & a complex blending technology to combine a number of powerful biocides which are not normally expected to work well together. In Aqueos, these biocides work synergistically together, each one enhancing the effect of the other.

The mixing technology allows the biocides to be used in extremely low concentrations.

As well as allowing the combination of many biocides, the base also gives the product its *long lasting effect*. On application, the product disrupts the surface tension of the treated surface and makes it difficult for new micro-organisms to attach themselves to the surface. Micro-organisms cannot proliferate without a good attachment to the surface. This surface disruption remains for a long time after the product has dried and has an accumulating effect over time.

Aqueos works at both the chemical and the physical level. At the physical level, the disruption of the surface tension *physically weakens the organisms as their hold on the treated surface is reduced*. The weakened population is then subject to a variety of different chemical attacks from the combined chemical elements of the product. *Because the population is already physically weakened, it is very vulnerable to chemical attack and therefore succumbs*

quickly. The result of this is called cell lysis which describes the bursting open of the walls of the individual cells.

An advantage of this method of killing micro-organisms is that they do not have the opportunity to develop resistance to the product. As a result, *there is no need to rotate disinfectant products and the user does not run the risk of declining effectiveness over time*.

Anti-Bacterial Dog Shampoo

Product Details:

- ✓ Kills bacteria, fungi & viruses
- ✓ Pleasant smell
- ✓ Effective Deodoriser including fox & badger smells
- ✓ Combats Itchiness
- ✓ Soothes minor skin irritations
- ✓ Gentle on skin, leaving coat soft
- ✓ Alcohol & phenol free
- ✓ Tested to EN1276, EN1650 & EN14476

Uses:

- ✓ Everyday Shampoo, Itchy Skin, Skin Irritations
- ✓ Disinfects minor scratches and grazes

Anti-Bacterial Disinfectant Wipes

Product Details:

- ✓ Kills bacteria, fungi & viruses
- ✓ Effective deodoriser including fox & badger smells

AQC4015

“My long haired GSD developed a smell that was repulsive and would not go. After three tries by the vet to get rid of it, I bought this shampoo in desperation. It is fantastic! Worked wonders without any skin irritation; I cannot recommend it more highly”

AQC6005,
AQC6200

These are great to have around with a black lab that loves to get dirty & wet !! Very handy to keep in the car

Anti Bacterial Hand Sanitiser

Product Details:

- ✓ Kills bacteria, fungi & viruses
- ✓ Carries on working after application
- ✓ Alcohol & bleach free
- ✓ Non sticky & fragrance free
- ✓ Will not dry skin
- ✓ No water required
- ✓ Non irritant
- ✓ Tested to EN1276, EN1650 & EN14476

Uses:

- ✓ Perfect when there is no water available to wash and disinfect hands

Anti-Bacterial Soap

Product Details:

- ✓ Kills bacteria, fungi & viruses
- ✓ Carries on working after application
- ✓ Alcohol & bleach free
- ✓ Non sticky & fragrance free
- ✓ Gentle & will not dry skin
- ✓ Non irritant
- ✓ Tested to EN1276, EN1650 & EN14476

Uses:

- ✓ Disinfects hands, ideal when whelping or for professionals that need to disinfect hands between handling new dogs

AQC6002,
AQC3002

50ml | 600ml

Have been using Aqueos disinfectant in my Canine Hydrotherapy Centre for a few years now so it was the obvious choice for a product to use when I had a litter of puppies in October. I made everyone who handled the puppies use the hand sanitising foam and the whelping box and floors were regularly sprayed with disinfectant. It was great to know it was safe to use around the puppies.

AQC4001

This was the perfect product to use when I had puppies, conditioned hands at the same time

- ✓ Disinfect grooming tables, surfaces and any equipment

1 Litre | 5 Litre | 5 Litre

AQC7005,
AQC7005RTU, AQC7023

Brilliant, this stuff really works. The dog smell disappears very quickly. I would definitely buy it again. The best product I have found to literally destroy the smell and not mask it.

AQC1200,
AQC1002

200ml | 750ml

'This stuff is a 'must have' for new puppy owners. Our house doesn't smell of dog wee even though the hall carpet is covered in stains. Hall decoration and replace of the carpet will be happening in the near future as our puppy is now house trained'.

First Aid Spray

Product Details:

- ✓ An Essential for Animal First Aid Kits
- ✓ Aids Natural Healing Process

- ✓ Clean/disinfect area to be covered, spray and protect

AQ902

When there were local cases of Alabama Rot, used this product to spray the dogs paws after walks. Have also used on dogs when they have cut themselves to stop any infection

AQ901

Zep the 18 month old boxer sustained an incision between his toes on his near side front whilst out on a walk, once this had been bathed the Aqueos Spray Plaster was applied, this is a revolutionary product for such injuries The wound healed with no further complications. I will definitely use this product in the future, it is a must for my first aid cupboard'
