

BOC LIFELINE®

Emergency resuscitation equipment
Saving minutes, saves lives

Saving minutes, saves lives

Modern and easy to use resuscitation equipment is helping more people than ever to survive medical emergencies such as cardiac arrest. Although these events are relatively rare they can happen at any time so it is vital to be prepared.

The LIFELINE range of resuscitation equipment is designed not just for use by medical professionals such as doctors and dentists but also by appropriately trained first aid personnel in the work place and community. LIFELINE from BOC Healthcare allows first-aiders to administer oxygen during CPR while waiting for an ambulance to arrive. It is also designed to provide initial treatment for conscious patients during medical emergencies.

The LIFELINE kit is contained in a purpose-made rucksack style carry case for easy transportation to the casualty. It contains a lightweight oxygen cylinder with an integral regulator and a selection of oxygen masks.

Oxygen can be delivered at between 1 and 15 litres per minute. This provides up to half an hour of treatment at the highest flow rate, helping to prevent the patient deteriorating prior to the arrival of professional medical assistance.

The oxygen cylinder is inspected annually by a BOC employee to ensure that the cylinder is in good working order. A report is produced and left with our customers as an auditing record.

BOC Healthcare's dedicated LIFELINE team provide a next working day refill service. The kit can also be tailored to meet your specific requirements with additional equipment¹ such as:

- Bag valve masks
- Paediatric masks
- Airways
- Suction devices

As part of a complete resuscitation solution, BOC Healthcare supply a range of Automated External Defibrillators (AEDs) from leading manufacturer Cardiac Science. All units are incredibly easy to use. Key features include simple, clear and instructive voice prompts and an industry leading four year full replacement battery guarantee.

LIFELINE benefits

- Safe and simple to use
- Fully portable
- Lightweight oxygen cylinder with built in, integral regulator
- Variable flow rates from 1 to 15 litres per minute
- Annual cylinder maintenance by BOC Healthcare
- Single annual service charge
- Next working day refills²
- Reduces the risk of cross infection due to minimal patient contact

What is included in the LIFELINE kit?

- A lightweight oxygen cylinder with integral valve
- One CPR facemask
- One length of cuffed tubing
- One adult non-rebreathing mask
- One pair of nitrile gloves
- One clinical waste bag
- LIFELINE signage

¹ Charge applies.

² Monday to Friday inclusive and excludes some remote geographies.
