

To Whom It May Concern,

If you are receiving this letter, you may be a person responsible for employee compliance in mandated CPR & First Aid certification. I understand that it is your responsibility to audit and ensure the quality and accreditation of employee certification. It is also likely that you may not be familiar with ProTrainings. I can assure you that our students receive the highest standard of education via our e-learning methodology. Please allow me to explain further.

ProTrainings follows the most current ECC/ILCOR and American Heart Association recommended guidelines for ACLS, PALS, Healthcare Provider BLS and Workplace CPR & First Aid. As such, ProTrainings' certifications are equivalent to American Heart Association and American Red Cross certifications for healthcare providers and the general workplace. ProTrainings fully meets the requirements for Joint Commission, Medicare, OSHA and many other accrediting bodies.

Our curriculum has been reviewed and accepted by numerous national organizations, state licensing boards, and hundreds of other employers like yourself. At your request, I would be happy to send our letters of acceptance and references, along with our full curriculum for your review.

Below are two programs we offer that are relevant for your consideration.

Blended Program:

This program is designed for employers that require their staff to demonstrate skills with a live instructor. Our fully accredited blended program allows students to reap the benefits of online education while still incorporating the traditional hands-on practice of the classroom. Students complete the cognitive portion and exam online and then perform their skills in one of the following ways: (a) with a live skill evaluator from our instructor network, (b) with a trained in-house employee, or (c) remotely with a ProTrainings instructor via webcam.

Corporate Program:

Whether the employee or the employer pays for the certification, administrators can still reap the benefits of our corporate program. Our administrator dashboard allows you to monitor employee certification status, receive email reminders when an employee's certification is about to expire, and gain 24/7 web-based access to certification details in the case of an audit. Students are able to certify on their own time, at their own pace, and gain significant cost savings through a negotiated corporate rate.

Please do not hesitate to contact me for additional information about our programs, credentials, or if you have any questions in general. Thank you for your time and I look forward to speaking with you soon.

Sincerely,

Jody Marvin

Director of Training and Compliance
